

Dual Diagnosis

Rarely is addiction not driven or complicated by mental health disorders. Alongside opioids, we specialize in treating anxiety disorders, PTSD, and other chemical and behavioral addictions.

Evidence Based Therapy With a Focus on Harm Reduction

Doing whatever it takes to stay alive and well. Medication-assisted treatment (MAT), medication management, Suboxone tapers, and Vivitrol are a few examples.

Experiential

The spaces we spend our time in, the food we eat, and how we move our bodies impact how we feel. We've created an environment where you can rest, recuperate, and be inspired so you can focus on healing.

Trauma Focused

EMDR, ART, and psychodrama are common approaches we use to facilitate healing from overwhelming experiences.

Mindfulness Based

Mindfulness-based relapse prevention is foundational to our model for maintaining sobriety through the recovery process.

Community Centered

Healing and transformative happen in the context of supportive relationships. It's no surprise that boredom and loneliness go hand-in-hand with addiction (and American culture).

Spiritually Grounded

Through adventure trips, spiritual direction, and community, we will give you the opportunity to explore meaning, purpose, and spirituality.

Admissions & Payment

Step 1: Call 321.420.4656 or email hello@peace.club

Step 2: We'll verify your insurance benefits

Step 3: Pre-assessment and eligibility

Step 4: Arrival, intake, and clinical assessments

Quality over convenience.
Innovation over convention.
People over profits.

We are a FARR accredited and DCF licensed facility.

Our Story

Peace Club is a collection of individuals, held together by a love for people and their stories.

Peace Club was started out of necessity. Too many of our friends and neighbors have died from opioid-related deaths or find themselves trapped in a cycle of dependency. We hope to change this through a commitment to:

1. People and Local Communities
2. Evidence Based Treatment
3. Design, Beauty, & Inspiring Spaces
4. Adventure & Wellness Approaches
5. Modern Technology and Innovation

Dual Diagnosis Programs

Our programs specialize in opiate harm reduction and consist of weekly individual, family, group, and adventure therapy in addition to drug testing, Medication-Assisted Treatment as needed, community experiences, and Family Support Groups.
